Summary

B.Tech graduate in Computer Science and Engineering with practical experience in web development and data analysis. Proficient in full-stack development using the MERN stack (MongoDB, Express.js, React.js, Node.js). Currently working as an Associate Software Engineer Trainee at HabileLabs. Strong in problem-solving, design principles, and front-end/backend development.

Education

Swami Keshvanand Institute Of Technology, Jaipur (2021-25)

- Bachelor of Technology (B.Tech) in Computer Science and Engineering CGPA: 8.76*

S S S Sr Sec Edu , Kheerva, Sambherlake (Jaipur) (2019-20)

- Senior Secondary (XII) with Science and Mathematics Percentage: 75.6%

A I A, Mandha BhimSingh, Sambhar lake (Jaipur)) (2017-18)

- Secondary education(X) with a focus on all compulsory subjects Percentage: 86.17%

Experience

HabileLabs Pvt. Ltd. — Associate Software Engineer Trainee (06/2025 - present)

HabileLabs Pvt. Ltd. (07/2024 - 09/2024)

- Built responsive and dynamic UIs using React.js
- Improved website performance by optimizing React components

Celebal Technology (06/2024 - 08/2024)

- Enhanced and modernized websites using HTML, CSS, and JavaScript
- Analyzed and improved code for faster loading and better UX

IBM SkillBuild (06/2023 - 08/2023)

- Assisted in analyzing datasets using Python
- Generated insights and presented findings for real-world business use cases

Skills

- Languages: C++, SQL, HTML, CSS, JavaScript, React.js, Node.js
- Frameworks/Stacks: MERN Stack (MongoDB, Express.js, React.js, Node.js)
- Tools: GitHub, VS Code, Google Colab .
- Concepts: Object-Oriented Programming (OOP), Data Structures Algorithms, DBMS

Selected Projects

Training and Placement (TNP) Cell Web Application – MERN Stack

- Designed and implemented a full-stack web app to streamline training and placement workflows
- Included features like admin dashboard, student login, result management, and analytics

Social Media App

- Developed a responsive social media app using React.js.
- Ensured scalability and optimized performance.

Restaurant Landing Page

- Designed and developed a responsive landing page using HTML and CSS.
- Integrated interactive JavaScript features, including image sliders, drop-down menus, and form validation.

Case Study: Analysis Of Superstore Data

- Analyzed superstore sales data using Python.
- Identified areas for sales improvement by analyzing performance across product categories and regions.
